

RAFAEL  
GALINDO  
CERAMISTA

Degree in Chemical Sciences. I have developed my professional activity as a teacher in the Vocational Training of the Professional Family of Glass and Ceramics from 1985 to 2015, training students in ceramic technology.

While exercising this professional activity, I have taught subjects such as chemistry and ceramic technology; quality management and production; and development of ceramic pastes and glazes.

I was the coordinator of the first training experience in industrial ceramics for the Department of Education of the Generalitat Valenciana (years 1985 - 1988). I have organized and participated in teaching of 169 courses for technicians and workers of the ceramic industry and I have published 4 books on ceramic technology and 2 books on guides for learning and practices in ceramics.

I have directed the work groups that included in the "Project for the Renewal of Contents of Vocational Training" produced the Royal Decrees which established the curricula of the new Training Cycles of glass and ceramics and I also directed the groups of work that defined the qualifications of the professional family of glass and ceramics for the National Institute of Qualifications, participating as an expert in some of its revisions and updates.
